INTRODUCTION TO ENNEA TOKEN

Launched in December 2021, Ennea is a decentralized digital currency, without a single administrator, it's all independent. The community controls all of the tokens. Ennea is a fixed supply token with no new minting. All tokens that will ever exist have already been created. We believe in a truly fair and decentralized world so Ennea launched 100% fair with no presale and no team tokens. All of the Ennea tokens were added directly to liquidity on Pancakeswap. Liquidity is locked until 2025. Ennea community controls 100% of all tokens. Ennea is happy to provide everyone the opportunity to invest safely into the most current and hottest project launch on Binance Smart Chain.

WHY BINANCE SMART CHAIN?

Binance Smart Chain (BSC) was developed as a means of utilizing solidity-based smart contracts with much greater speed and efficiency than other, competing chains. With decentralized exchanges on BSC offering lightning-fast swaps and extremely low fees, BSC has started to become one of the most widely used blockchains for Decentralized Finance (Defi). BSC uses a token protocol developed by the BinanceTeam called BEP-20

Advantages of the Binance smart chain are:

It's a proprietary blockchain, which will provide security and safety to all users and developers.

Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience. It's EVM-compatible and will support all of the existing Ethereum tools along with faster and cheaper transactions.

Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.
